Dual 90 Watt LED Video Light Fixtures & Stands

Model LED-90K

Engineered for a wider beam that travels up to 30 feet. The 77 individual high intensity 10mm LED bulbs in each light are designed for the highest light output but with minimal power usage. These lights are completely portable.

When using portable power you have the choice of 6 AA rechargeable NMH or standard alkaline batteries. Using 2600 mah NMH rechargeable batteries will give up to 2.5 hours of run time. Model 90-645 (see below) an external battery will last 4 hours. Two AC adaptors are included to run the lights from standard household 110 volt outlets.

• Built in color correction filter for reduce glare in both indoor or outdoor lighting setups
