One Button Two Lasers

Now available...
Full HD video at the tip of your glove.

HD Helmet Camera

Easy to Use

Big or Bigger Video

ContourHD and ContourHD 1080p have multiple video resolutions you can choose from to remember your HD helmet cam adventure.

[Learn Which to Buy >>](#)

- Full HD - 1080p (1920x1080) **1080P**
- Tall HD - 960p (1280x960) **1080P**
- Action HD - 720p (1280x720) **1080P**
- Contour HD - 720p (1280x720)
- Fast SD - WVGA (848x480)

Framed for Speed

If you'd rather pick your helmet camera resolution by frame rate, ContourHD 1080p offers three and ContourHD offers two. Now the fastest action will be butter smooth or ready to replay in s...l...o...w... motion.

30fps (1080p and 720p) 60fps (720p and WVGA)

Configurable

ContourHD gives you choices. Use the Easy Edit software to dial in your contrast (high, med or low), exposure (-4 to +4), metering (spot, center, avg), and the gain of the microphone, making the ContourHD the world's most configurable HD wearable camcorder.

Capture the Whole Scene

At 135 degrees, the ContourHD Wearable Camcorder lens strikes the perfect balance in capturing the entire scene without over-distorting the video.

Wearable Anywhere

We take "wearable" seriously! With our patent-pending TRail™ Mounts, "slide and lock" your ContourHD helmet cam onto a series of mounts for your goggles, helmet, handlebars, vehicle, or anywhere else you can think of.

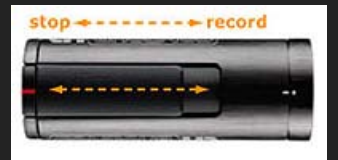

Smallest in the World

Fitting in the palm of your hand and weighing almost nothing (4.3 ounces), ContourHD is the smallest and lightest HD Wearable Camcorder in the world.

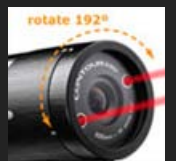

One Button

ContourHD's operations couldn't be easier. Slide the record switch forward to record and slide it back to stop. Record in silent mode (no beeps)? Yep, that's an option too.

Dual Laser Alignment

Have you ever seen a camera with lasers? ContourHD helmet camera uses two of them and a 180° rotating lens to ensure you line up the shot every time.

Armored Body

A water-resistant HD helmet cam for all seasons, its anodized aluminum body withstands dust, dirt, mud, and snow. It's also shock, vibration and impact resistant.

Hours of HD Video

An all-in-one HD wearable camcorder means there are no wires or tapes. ContourHD records to a removable, internal MicroSD memory card, capturing hours of HD quality video (compatible up to a 16GB Memory Card).

With Full Audio

We believe video from within the action is better with sound! The ContourHD microphone does its best to keep the wind noise to a minimum while keeping the sounds of the ride rich. Configure the microphone on your ContourHD 1080p camera to the action sounds you want.

Rechargeable Battery

No need for AA batteries with your ContourHD HD wearable camcorder. Powered by a removable, rechargeable battery you'll get up to 3 hours of HD video with either model.

Click to Share

The included Easy Edit™ software makes it automatic to import your videos from the camera, clip out the best parts, and post them to VholdR.com. Show your friends what you did and earn props from the community.
