PRODUCT DEMOS

An Affordable Document Cam

Available at a fraction of the cost of the usually expensive and cumbersome document cams, the IPEVO Point 2 View (P2V) USB Camera is an affordable and easy-to-use alternative to make your classroom and presentations more interactive and dynamic. Simply plug the P2V in to your existing Mac or Windows computer connected to a projector and use the P2V to display notes, math problems, maps, and share printed articles and clips without having to spend money on copies.

Versatile Live Image Projector

Featuring a solid weighted base and multi-jointed stand, the P2V brings an extra dimension to your presentation. In addition to showing printed notes and articles, the P2V can be used to show 3-dimensional objects at any angle—ideal for subjects like Science, Geometry, and Art classes.

Get a Lot Closer

With its high-resolution 2.0-megapixel CMOS sensor and full autofocus lens, the P2V USB Camera delivers great image quality even when projected onto the big screen. With a Macro focus as close as 1.5" (5cm), you can zoom into the specific details you want to present.

One-Click Image Capture

Coupled with the included snapshot software, snap images from the class and use the images for study guides and tests, or incorporate into PowerPoint presentations.

Webcasts and Video Chats

The P2V is a USB 2.0 Video Class (UVC) device, which means it is plug-and-play on Macs and Windows PCs (see System Requirements), and compatible with most video conferencing and web-casting softwares including Skype, Google Talk, Windows Live Messenger, iChat, Yahoo! Messenger, and AIM.

SYSTEM REQUIREMENTS
- Mac OS X 10.5 or higher
- Microsoft Windows 7, Vista or XP
- 1.4GHz CPU or higher (2.4GHz recommended)
- 512MB RAM (1GB recommended)
- 200MB free hard disk space
