

VoIP CONFERENCE STATION

BUSINESS QUALITY COMMUNICATION OVER THE INTERNET

X1-N6

Award-winning design delivers outstanding performance

Designed exclusively for Internet conference calls, IPEVO's award-winning VoIP Conference Station combines excellent sound quality and unique design features to make Internet conference calls an effortless and productive experience.

Exceptional sound quality optimized for VoIP

The 16KHz sampling rate (twice the rate of traditional PSTN network) of X1-N6's 16-bit Digital Signal Processor (DSP) achieves optimal balance between high voice quality and network performance. The full-duplex DSP also performs echo cancellation and background sound filtering for real-time and natural conversation free from interference or noise.

The shape and texture of form and function

The unique shape of X1-N6 provides convenient layout and easy access to its controls and functions. The detailed metallic mesh completes X1-N6's elegant and refined appearance, also weaving together key design features seamlessly for a professional finish that doesn't look out of place in the office.
