Pros: small light easy to use

"I've had my Zi8 for about 3 months and it is so easy to use, easy to download videos and photos, and easy

to carry around. I love that you can use a memory card or download directly to your computer."

"The recording is great. The audio is great and best of all, you can use an external microphone! We used it to record our Studio video. Easy and results are fantastic! Downloading is a breeze. The quality of the recording is nice just as if we used a videographer. Dont need one now."

I have a battery problem

By [Decla](#) from Texas

June 30, 2010

"I really like this little video camera and use it with a 32 gb sd card for the maximum 10 hours. Trouble is, the battery runs down really fast. I have had to buy a couple of extra batteries to take with me if I am going to be recording more than about 20 minutes. Also, I don't know if all of these cameras are like this, but when I leave my camera inactive for any length of time, the battery goes dead. Other than the battery problem, I am totally happy with it!"

"The ARC Soft software is very difficult to use and help from Kodak with software questions is non-existent. I do not like the fact that I can not copy these videos on a CD and send to someone who does not have the software to open the videos. The camera itself is easy to use."
