The 23-inch Apple Cinema HD delivers enough resolution to support high-definition video content with room to spare, and it's ideal for color-critical work. The Cinema HD delivers superb color in resolutions up to 1920 x 1200 pixels. You can put it to work designing magazine layouts, editing film or analyzing complex molecules.

The Cinema HD features an active-matrix liquid crystal display that produces flicker-free images that deliver twice the brightness, twice the sharpness and twice the contrast ratio of a typical CRT display. Unlike other flat panels, it's designed with a pure digital interface to deliver distortion-free images that never need adjusting. With over 2.3 million digital pixels, the display is uniquely suited for scientific and technical applications such as visualizing molecular structures or analyzing geological data.

Its widescreen format and high resolution make this a perfect display for creative professionals. With room for viewing two full pages of graphics and text simultaneously, you can forget about wasting time scrolling through a document or toggling between windows. And you'll have plenty of room for tear-off menus, palettes, and toolbars.

Offering accurate, brilliant color performance, the Cinema HD delivers up to 16.7 million colors across a wide gamut allowing you to see subtle nuances between colors from soft pastels to rich jewel tones. A wide viewing angle ensures uniform color from edge to edge. Apple's ColorSync technology allows you to create custom profiles to maintain consistent color onscreen and in print. The result: You can confidently use this display in all your color-critical applications.

Housed in a new aluminum design, the display has a very thin bezel that enhances visual accuracy. The display features two FireWire 400 ports and two USB 2.0 ports, making attachment of desktop peripherals, such as iSight, iPod, digital and still cameras, hard drives, printers and scanners, even more accessible and convenient. Taking advantage of the much thinner and lighter footprint of an LCD, the new displays support the VESA (Video Electronics Standards Association) mounting interface standard. Customers with the optional Cinema Display VESA Mount Adapter kit gain the flexibility to mount their display in locations most appropriate for their work environment. The Cinema HD features a single cable design with elegant breakout for the USB 2.0, FireWire 400 and a pure digital connection using the industry standard Digital Video Interface (DVI) interface. The DVI connection allows for a direct pure-digital connection. If you're looking for an ideal display for your video, scientific, or graphics applications, we invite you to take a close look at the Apple Cinema HD Display.

Features:

Unrivaled display performance

23-inch (viewable) active-matrix liquid crystal display provides breathtaking image quality and vivid, richly saturated color.

Support for 1920-by-1200 pixel resolution for display of high definition still and video imagery.

Wide-format design for simultaneous display of two full pages of text and graphics.

Industry standard DVI connector for direct attachment to Mac- and Windows-based desktops and notebooks

Incredibly wide (170 degree) horizontal and vertical viewing angle for maximum visibility and color performance.

Lightning-fast pixel response for full-motion digital video playback.
Support for 16.7 million saturated colors, for use in all graphics-intensive applications.

Simple setup and operation

Single cable with elegant breakout for connection to DVI, USB and FireWire ports
Built-in two-port USB 2.0 hub for easy connection of desktop peripheral devices.
Two FireWire 400 ports to support iSight and other desktop peripherals

Sleek, elegant design

Huge virtual workspace, very small footprint.
Narrow Bezel design to minimize visual impact of using dual displays
Unique hinge design for effortless adjustment
Support for VESA mounting solutions (Apple Cinema Display VESA Mount Adapter sold separately)

Technical specifications

Screen size (diagonal viewable image size)

Apple Cinema HD Display: 23 inches (viewable)

Screen type

Thin film transistor (TFT) active-matrix liquid crystal display (AMLCD)

Resolutions

1920 by 1200 pixels (optimum resolution)
1280 by 800 pixels
1024 by 640 pixels

Display colors (maximum)

16.7 million

Viewing angle (typical)

170° horizontal; 170° vertical

Brightness (typical)

23-inch Cinema HD Display: 400 cd/m²

Contrast ratio (typical)

700:1

Response time (typical)

16 ms

Pixel pitch

23-inch Cinema HD Display: 0.258 mm

Screen treatment

Antiglare hardcoat

User controls (hardware and software)

Display Power,
System sleep, wake
Brightness
Monitor tilt

Connectors and cables

Cable

DVI (Digital Visual Interface)
FireWire 400
USB 2.0
DC power (24 V)

Connectors

Two-port, self-powered USB 2.0 hub
Two FireWire 400 ports
Kensington security port

VESA mount adapter

Requires optional Cinema Display VESA Mount Adapter (M9649G/A)
Compatible with VESA FDMI (MIS-D, 100, C) compliant mounting solutions

Electrical requirements

Input voltage: 100-240 VAC 50-60Hz
Maximum power when operating: 90W
Energy saver mode: 3W or less

Environmental requirements

Operating temperature: 50° to 95° F (10° to 35° C)
Storage temperature: -40° to 116° F (-40° to 47° C)
Operating humidity: 20% to 80% noncondensing
Maximum operating altitude: 10,000 feet

Agency approvals

FCC Part 15 Class B
EN55022 Class B
EN55024
VCCI Class B
AS/NZS 3548 Class B
CNS 13438 Class B
ICES-003 Class B
ISO 13406 part 2
MPR II
IEC 60950
UL 60950
CSA 60950
EN60950
ENERGY STAR
TCO '03

Size and weight

23-inch Apple Cinema HD Display
Height: 17.4 inches (44.3 cm)
Width: 20.9 inches (53.3 cm)
Depth: 7.3 inches (18.7 cm)
Weight: 15.5 pounds (7.03 kg)

System Requirements

Mac Pro
iMac with Intel Core processor or later*
MacBook Pro
MacBook*
Mac mini
Power Mac G4 or G5 with NVIDIA graphics card or ATI Radeon 7500 or better graphics card
PowerBook G4 with DVI port
Windows PC and graphics card that supports DVI ports with full single-link digital bandwidth and VESA DDC standard for plug and play setup

*Requires Mini DVI to DVI adapter, sold separately.
